

Albertsons Healthcare Partners with LYNX Lawrence & Mayo and Azooka Labs to upgrade Rural Science Labs in School and Colleges via Pay as you use model

Albertson Healthcare's **Science UP**grade Program is offered in partnership with

- LYNX Lawrence and Mayo, a leader in high end microscopes and high precision devices.
- Azooka Labs,, an IISc invested biotech startup with safe fluorescent-dye based kits and sample media collection kits.

Bangalore, 15 July 2021: Albertsons International Pvt Ltd ; a 26 year leader in offering reliable high-tech products and services for mission critical daily operations in Healthcare, Banking, and Retail industry. Albertsons has 21 offices pan India to reach out to schools, Science colleges, Diagnostic Laboratories, and Hospitals

Albertsons Healthcare has launched a **Science UP**grade RoadShow covering 12 cities and towns across India in partnership with Lawrence and Mayo and Azooka Labs.

Most of the high-end science instruments are devices that are only available in Tier 1 cities and Ivy league institutions. Although some of the Private Institutions have devices, the consumables to run science experiments are imported and expensive. Students are unable to run experiments themselves and just end up pre-run seeing slides.

Albertson Healthcare launched its **Science UP**gradewith a Flexipay program that combines bright field and fluorescent Microscopes and all experiment related consumables as a one package with workshops covering syllabus. This will help educational institutions to get started with high end devices in their premises immediately and will be able to pay on recurring semesters

About the launch **Mr Victor Sequeira, Executive Director Albertsons** said **Science UP**grade Program and awareness roadshow is aimed at bringing the latest technology microscopes and science experiments to Tier 2 and tier 3 e cities. Albertsons offers a unique pay-as-you-go model that allows schools and colleges to

upgrade their science Labs. via flexible payment models. He further added “The pay as you go model will enable rural schools to get started with Hitech experiments for as low as Rs. 3999”

Dr Vivek G Mendonsa Group Director, LYNX Lawrence and Mayo said

“We are excited to about the partnership as it will upgrade schools and colleges to molecular grade sample collections kits and safe fluorescent kits to replace toxic and hazardous chemicals such as acetocarmine and Ethidium Bromide from schools and colleges” said **Alex Paul, CEO, Azooka Labs**
