The future of currency management is here.

Handle cash with ease, so you can serve customers with a smile.

Choose CashClean.

Ready to revolutionise the way you handle currency?

Albertsons proudly presents the CashClean series – a pinnacle of cutting-edge technology and innovation in note-sorting machines. Designed for modern businesses and financial institutions, the CashClean series ensures accuracy, security, and efficiency in currency handling.

CURRENCY PROCESSING MACHINES

CashClean 150FK

Your path to impeccable currency fitness sorting in 1+1 pocket configuration

Features

- Detects suspect currency using advanced technology.
- Sorts damaged, folded, or incomplete notes according to RBI guidelines.
- Multi-function capabilities: fitness sorting, mix counting, adding, and more.
- Genuineness identification based on the first feeding note.
- Sleek design with Super LED display.

CashClean 250F

Precision meets performance in 2+1 pocket configuration

Features

- Top-tier sensors for ultimate accuracy.
- Fitness sorting, mix counting, and value counting functionalities.
- User-friendly 4.3” Touch Display.
- Seamless connectivity through USB, serial port, and LAN.
- Enhance your operations with CashClean 250F.

CashClean 450F

Elevate efficiency with 4+1 pocket perfection

Features

- Ample capacity: 1000-note stacker, 100-note reject.
- Advanced sensors ensure comprehensive currency examination.
- External 7” Touch Display for enhanced interaction.
- Multi-currency support with OCR capabilities.
- Step into the future of currency sorting.

CashClean 450F Plus

Unparalleled performance in 4+2 pocket configuration

Features

- Extended capacity: 1500-note hopper, 500-note stacker.
- Streamlined user experience with 7” Touch Display.
- Innovative features: Batch card processing, Face Orientation recognition.
- Optimal connectivity via USB, serial port, and LAN.
- Elevate your currency management to new heights.

Benefits at a glance

- Cutting-edge CIS, DSP, and precision manufacturing technology.
- Automatic detection of suspect currency through multiple imaging techniques.
- Conforms to RBI guidelines for note authentication and fitness sorting.
- Swift and accurate multi-function operations.
- Seamless software upgrades for future enhancements.
